

What is the link between Personality and Software Quality?

Please support me in my research!

Hello,

my name is Erica Janke. I'm a PhD student at the University of Stuttgart and a research associate at the Neu-Ulm University of Applied Sciences. In my research, I am exploring the link between the personality of software engineers and different quality attributes of the software, they produce.

You could support me in my research by doing the following:

- Fill out an online questionnaire about your personality – this might be also interesting for you :-) The questionnaire takes less than 10 minutes. Here is the link:

<https://survey.hs-neu-ulm.de/limesurvey/index.php/931921/lang-en>

- Your participation in the online survey allows me to analyze your code which you contributed as solutions to the Transformation Tool Contest (static code analysis).

Thank You Very Much For Your Support!

If you are interested in further information on my research, please don't hesitate to contact me (+49(0)731-97621527, erica.janke@hs-neu-ulm.de)
